

A STORY 1.7 BILLION YEARS IN THE MAKING
A NEW GIANT SCREEN EXPERIENCE

GRAND CANYON

RIVERS OF TIME

NOW PLAYING

Grand Canyon: Rivers of Time takes the viewer on a journey through time at one of the world's greatest natural wonders. From Native American mythology and geologic explanations, we explore the origins of this great canyon. The human history of the Canyon comes alive through dramatic recreations, starting with the first inhabitants, the Ancient Puebloans whose civilization mysteriously disappeared. Travel through time to witness the "discovery" of the Canyon by both Spanish conquistadors and a colorful frontiersman, whose hostile relations with Native Americans foretold future difficulties. Experience firsthand the harrowing journey of John Wesley Powell as he and his men plunge down the never-before conquered rapids of the Colorado River, straight into unknown dangers. The love of the Canyon by Teddy Roosevelt, nostalgic photo albums of visitors from as early as the 1890's, the animals of the region, and soaring flights above the Canyon round out this deep dive beyond the rim of the Canyon.
